

Established in 1985, CGS Publishing Technologies International GmbH is a global leader in color management, digital proofing and specially formulated media. Headquartered near Frankfurt (Germany), CGS also has operations in the United States, Japan and many other countries, as well as sales and support partners throughout the world. For our product development, we maintain business relationships with printer manufacturers such as Canon, Epson, Hewlett Packard and Xerox as well as leading suppliers of color measurement devices.

We are expanding the capacities of our software development department and are therefore, for the earliest date possible, looking for an

Quality Assurance Engineer

for our headquarters near Frankfurt/Main, Germany

Your responsibilities include:

- Maintain our quality assurance (QA) system
- Keep optimizing existing test procedures and approaches
- Check results of automated test procedures and track down issues
- Support the software engineers in fixing the issues
- Proactively develop new test procedures
- Further improve and develop our QA system

What you can expect from CGS:

- You will join a team of professional software engineers
- You will be integrated into all phases of the software development cycle and are welcome to contribute your own ideas
- You will work on a wide range of challenging project

Your profile:

- University degree in computer science or other high-level IT qualification
- Experience with C++ and/or C#
- Experience with Microsoft development tools
- Ability to work autonomously and energetically for your goals
- Desire to expand you knowledge and to apply what you have learnt
- You will implement cloud solutions using cutting-edge technology and powerful systems
- Scrum-like team meetings
- Flexible working hours
- Job security
