

# ORIS COLOR TUNER // WEB

## Web-based Soft- and Hardcopy Proofing in one Package

CGS offers the industry's only web-based proofing system with integrated soft proofing and proof certification capabilities, all combined into one easy-to-use wizard-based software package. This provides the user with ultimate flexibility in color management with risk-free and reliable results.

With **ORIS COLOR TUNER // WEB**, CGS introduces a brand-new web-based version of its well-known product line. **ORIS COLOR TUNER // WEB** allows users to control and track print jobs from anywhere in the world via the Internet. The new user interface efficiently integrates the software features of ORIS Color Tuner, ORIS Soft Proof and ORIS Certified Proof into one product, making it easier to manage and monitor global remote proofing – increasingly important with the popularity of embedded measurement devices. **ORIS COLOR TUNER // WEB V3.2** fully supports Epson SpectroProofer with virtually all x900 printer models and SureColor SC-P series and also the spectrophotometer built into Canon iPF6450. The intuitive and user-friendly interface allows users to work quickly and efficiently within a closed-loop environment.

| Features  | Benefits  |
|---|---|
| APPE (Adobe PDF Print Engine 3.4.4)   | <ul style="list-style-type: none"><li>■ Print results are consistent with those of Adobe RIPs if APPE is used</li></ul>   |
| Web based   | <ul style="list-style-type: none"><li>■ Flexible cross-platform and cross-browser application</li><li>■ Real-time communication</li><li>■ Time and money savings (print media and shipping costs)</li><li>■ Easy to operate</li><li>■ No client software required</li><li>■ File upload via drag&amp;drop</li></ul> |
| Soft proofing   | <ul style="list-style-type: none"><li>■ Real-time viewing of soft proofs anywhere in the world</li><li>■ Environmentally friendly</li></ul>   |
| Cross-platform clients  | <ul style="list-style-type: none"><li>■ Easy integration</li><li>■ No additional software required</li></ul>  |
| Client-server architecture  | <ul style="list-style-type: none"><li>■ High level of network security</li><li>■ User groups</li><li>■ Low-cost client-side hardware</li></ul>  |
| Color management – hardcopy and soft proofs are matched to the same standards | <ul style="list-style-type: none"><li>■ Proofing to industry standards such as:<ul style="list-style-type: none"><li>■ SWOP</li><li>■ ISO/FOGRA</li><li>■ 3DAP</li><li>■ G7</li><li>■ UGRA/FOGRA Media Wedge V2.2 and V3</li></ul></li></ul>  |

|   |   |
|---|---|
| Optimum spot color rendering  | <ul style="list-style-type: none"> <li>■ Support for all Pantone, Pantone Live, Esko and HKS libraries</li> <li>■ Interface to Esko Color Engine</li> <li>■ Iterative optimization of individual spot colors</li> <li>■ Spot color correction via CxF/X-4 data embedded in PDF files</li> </ul>   |
| Integration with ORIS Certified // Web  | <ul style="list-style-type: none"> <li>■ Certification results can be displayed in web browser</li> <li>■ Use of Epson SpectroProofer or Canon spectrophotometer for remote certification</li> </ul>  |
| Additional features   | <ul style="list-style-type: none"> <li>■ Easy creation of media profiles</li> <li>■ Export and import tools for transferring configuration settings to other installations</li> <li>■ Can operate any Windows printer</li> <li>■ Uses the printer manufacturer's original screening and resolution setups</li> <li>■ Database backup and restore utility</li> <li>■ Epson SpectroProofer and Canon spectrophotometer fully supported</li> <li>■ Integrated print job editor for quickly replacing and omitting color separations</li> <li>■ Selective color correction (fine tuning)</li> <li>■ Profile smoothing and averaging</li> <li>■ Support for Hexachrome and multi-channel profiles</li> <li>■ Continuous and halftone proofing option for color-accurate screened proofs</li> </ul> |
| Printer setup wizard  | <ul style="list-style-type: none"> <li>■ Fast wizard-driven setup of print queues</li> <li>■ Wizard-driven linearization, calibration and profiling</li> </ul>  |
| Simulation profiles for all supported printers and common press conditions available for download | <ul style="list-style-type: none"> <li>■ „Plug and proof“ for calibrated printers</li> </ul>  |

### Supported File Formats

ORIS COLOR TUNER // WEB supports all common prepress file formats including PDF/X, composite or separated, PDF, PostScript, EPS, DCS, JPEG, TIFF, TIFF/IT-P1, 1-bit TIFF, Esko LEN, Scitex Handshake CT/LW, Scitex NLW and NCT, INX ISJet.

### Software

- **Operating system:** Windows 10 (64 bit) or newer, Internet Explorer 11 or newer

### Hardware

- **Processor:** Intel® Core i7 6th generation or better
- **Memory:** 16 GB Memory (RAM) or more
- **Hard disc:** Non-partitioned SSD system disk with 500 GB or more
- **Video card:** DVI with DirectX 9c support and Direct 3D acceleration

The hardware requirements depend on the operating system and the type and number of output devices.

### Supported Measurement Devices

- X-Rite: All currently available models
- Barbieri: Spectro Swing, Spectro LFP/LFP qb and Spectro qb NET
- Konica Minolta: FD-5, FD-5BT, FD-7 and FD-9
- ColorScout A+ with FD-5, FD-7, X-Rite Ci61/Ci64/Ci64L
- Supported measurement conditions: M0, M1 and M2
